

Komara 20

VIKOMA

Oil recovery solutions since 1967

Quality
Reliability
Innovation

Ensuring an effective solution to your oil spill requirements!

- A highly efficient disc skimmer
- Includes 4 disc banks for 360° recovery
- Can be used in ports and harbours, shoreline operations and coastal waters
- World renowned as one of the most trusted skimmers used by responders globally.

Vikoma has developed the design and use of oleophilic disc technology to provide highly efficient recovery of oils with minimal water pick up.

Vikoma's Komara range of oleophilic disc skimmers are probably the best known and most widely used skimmers in the world.

The Komara 20 skimmer combines a recovery rate up to 20 tonnes per hour dependant on various criteria including oil viscosity, temperature, slick thickness, sea state etc..

The Komara 20 can be used in ports and harbours, shoreline operations and coastal waters, and almost any similar situation where oil needs to be removed from water.

The Komara 20 skimmer has four individual disc banks to create a 360° flow of oil towards the skimmer. It is perfectly suited for recovering a wide range of oils from very light to heavy contaminants with minimal free water pick up.

As a system, the Komara 20 is supplied with a powerful GP10 diesel hydraulic powerpack, transfer pump and necessary hoses and connectors.

The system can recover oil at a rate of up to 22m³/hr, independently witnessed and verified by Lloyd's assessors. The powerful lobe pump itself is rated at 42m³/hr

The K20 system includes a trolley mounted VikoPump positive displacement lobe pump for portability. The powerful V190 pump can handle even the heaviest oils. The pump can also be used as a separate transfer pump when not connected to the skimmer.

Product Benefits:

- Highly efficient disc skimmer
- 4 disc banks for 360° recovery
- 98% oil pick up at 20m³/hr

Capacity

20m³ per hour

System components

Komara 20 Skimmer Head.
GP10-2 Diesel Hydraulic Powerpack.
VikoPump V190 Positive Displacement Lobe Transfer Pump.
Hose Kit.

Optional extras

GP10-2E - Electric Start Powerpack. Also available as a combined system with Komara Star 20. Powerpack available with additional safety features, such as spark arrester and automatic overspeed shutdown.
