

Joining Instructions: Course in Oil Spill Response Command & Control (IMO3) - 2020

Introduction

The Course in Oil Spill Response Command & Control has been designed to meet the needs of member companies who have identified senior staff members as potential incident controllers of oil spill response incident management teams.

The course provides a practical and theoretical grounding in key oil spill response incident management techniques and applies these learnings through intensive functional desktop exercises that simulate an incident management team environment.

Audience	Senior industry or government personnel who may be required to fulfil the role of an Incident Controller for marine oil spill response. Experienced emergency managers from other disciplines; aspiring incident controllers with strong oil industry or oil spill response knowledge.
Aim	To train and qualify personnel for potential appointment as Oil Spill Incident Controllers.
Objectives	<p>At the end of this course, participants should be able to:</p> <ol style="list-style-type: none"> 1. Work within relevant legislation and guiding frameworks including OHS, the intergovernmental agreement and relevant contingency plans. 2. Identify characteristics of and assess oil spills, implement appropriate initial actions and identify and make appropriate notifications. 3. Implement appropriate initial actions and identify and make appropriate notifications in the case of an oil spill. 4. Apply knowledge of a set range of oil spill response strategies to identify appropriate response. 5. Apply knowledge to identify appropriate oil spill response equipment. 6. Record, communicate and distribute oil incident response information within the structured environment of an incident control centre. 7. Develop appropriate oil spill response strategies taking account of social-economic, environmental and insurance considerations. 8. Lead a multi-agency oil spill management team to develop and implement ongoing response 9. Monitor and evaluate the effectiveness of oil spill response strategies and implement alternate strategies if necessary. 10. Communicate technical details of an oil spill response to stakeholders including government and media 11. Make decisions under pressure of changing situations and timeframes.

Course Content	<p>During the course the following modules will be covered:</p> <ul style="list-style-type: none"> • Overview of spill response which includes Australian response arrangements and incident command systems. • Oil spill response initial actions including oil spill assessment, characteristics of spilt oil, oil spills & the environment. • Oil spill response techniques which includes monitor and evaluate, dispersants, protection and deflection, containment and recovery, shoreline clean-up, response alternatives, ending an oil spill response. • Oil spill response critical areas which includes oiled wildlife response, waste management, media and communications, liabilities claims and compensation, developing and incident action plan, health and safety. • Clarifying roles and responsibilities which is conducted through extended tabletop exercises and equipment deployments.
