

## Joining Instructions: Online Final Face to Face Exercise Day - Course in Oil Spill Response Command & Control (IMO III Equivalent) - 2022

Welcome to the final day of your Course in Oil Spill Response Command & Control (IMO III equivalent).

The following information includes further detail on how to participate in your final day of exercises required to complete your Command and Control course.

### Introduction

The Course in Oil Spill Response Command & Control has been designed to meet the needs of member companies who have identified senior staff members as potential incident controllers of oil spill response incident management teams.

The course provides a practical and theoretical grounding in key oil spill response incident management techniques and applies these learnings through intensive functional desktop exercises that simulate an incident management team environment.

<b>Audience</b>	Senior industry or government personnel who may be required to fulfil the role of an Incident Controller for marine oil spill response. Experienced emergency managers from other disciplines; aspiring incident controllers with strong oil industry or oil spill response knowledge.
<b>Aim</b>	To train and qualify personnel for potential appointment as Oil Spill Incident Controllers.
<b>Objectives</b>	<ol style="list-style-type: none"> <li>1. Work within relevant legislation and guiding frameworks including OHS, the intergovernmental agreement and relevant contingency plans.</li> <li>2. Identify characteristics of and assess oil spills, implement appropriate initial actions and identify and make appropriate notifications.</li> <li>3. Implement appropriate initial actions and identify and make appropriate notifications in the case of an oil spill.</li> <li>4. Apply knowledge of a set range of oil spill response strategies to identify appropriate response.</li> <li>5. Apply knowledge to identify appropriate oil spill response equipment.</li> <li>6. Record, communicate and distribute oil incident response information within the structured environment of an incident control centre.</li> <li>7. Develop appropriate oil spill response strategies taking account of social-economic, environmental and insurance considerations.</li> <li>8. Lead a multi-agency oil spill management team to develop and implement ongoing response</li> <li>9. Monitor and evaluate the effectiveness of oil spill response strategies and implement alternate strategies if necessary.</li> <li>10. Communicate technical details of an oil spill response to stakeholders including government and media</li> </ol>

	11. Make decisions under pressure of changing situations and timeframes.
<b>Course Structure</b>	<b>Your Final Day Scenario simulations</b> - Real-time Oil Spill Response simulations, utilising an Oil Pollution Emergency Plan. Focuses on the Command and Control of the IMT, completing initial actions while gaining and maintaining situational awareness and selecting appropriate spill response strategies and supporting equipment, as well as consideration of health and safety, communications and waste.
<b>Assessment</b>	This course is competency-based and includes assessment throughout each of the elements outlined above.
