

## Joining Instructions: Course in Oil Spill Response Management (IMO II Equivalent) - 2024

### Introduction

The Course in Oil Spill Response Management (IMO II equivalent) has been designed to meet the needs of member companies who have identified staff as functional leads in oil spill response incident management teams.

The course provides a practical and theoretical grounding in key oil spill response management techniques and applies these learnings through intensive functional desktop exercises that simulate an incident management team environment.

<b>Audience</b>	<p>Industry managers, subject matter experts and government personnel who may be required to fulfil functional area leads within an oil spill response incident management team.</p> <p>Emergency managers from other disciplines seeking to broaden their knowledge and expertise; aspiring emergency managers with strong oil industry or oil spill response knowledge. Incident management staff seeking to broaden their knowledge of oil spill response planning, operations and logistics roles.</p>
<b>Aim</b>	<p>To train and qualify personnel for employment in an Oil Spill Incident Control Centre (ICC).</p>
<b>Objectives</b>	<p>At the end of this course, participants should be able to:</p> <ol style="list-style-type: none"> <li>1. Work within relevant legislation and guiding frameworks including OHS, the intergovernmental agreement and relevant contingency plans.</li> <li>2. Identify characteristics of and assess oil spills, implement appropriate initial actions and identify and make appropriate notifications.</li> <li>3. Implement appropriate initial actions and identify and make appropriate notifications in the case of an oil spill.</li> <li>4. Apply knowledge of a set range of oil spill response strategies to identify appropriate response.</li> <li>5. Apply knowledge to identify appropriate oil spill response equipment.</li> <li>6. Record, communicate and distribute oil incident response information within the structured environment of an incident control centre.</li> <li>7. Work within a multi-agency oil spill management team in an oil spill response control centre.</li> <li>8. Within a defined structure, contribute to the development and implementation of an incident action plan.</li> <li>9. Using a variety of sources, identify, analyse and evaluate information to select, locate and coordinate oil spill response equipment and other resources.</li> <li>10. Coordinate the logistics to manage the temporary storage and disposal of oil spill waste.</li> </ol>

<b>Course Content</b>	<p>During the course the following modules will be covered:</p> <ul style="list-style-type: none"> <li>• Overview of spill response which includes Australian response arrangements and ICS overview.</li> <li>• Oil spill response initial actions including oil spill assessment, characteristics of spilled oil, oil spills &amp; the environment.</li> <li>• Oil spill response techniques which includes monitor and evaluate, dispersants, protection and deflection, containment and recovery, shoreline clean-up, response alternatives, ending an oil spill response.</li> <li>• Oil spill response critical areas which includes oiled wildlife response, waste management, media and communications, liabilities, claims and compensation, developing an Incident Action Plan, health and safety.</li> <li>• Clarifying roles and responsibilities which is conducted through a tabletop exercise, exercise verify scenarios and equipment deployment.</li> </ul>
