
Joining Instructions: **BLENDED - Course in Oil Spill Response Management (IMO 2 Equivalent) – Fremantle 2025**

Welcome

Dear Participant,

Welcome to the Australian Marine Oil Spill Centre (AMOSC). We're thrilled to have you on board. Our courses are crafted with meticulous care to meet the exacting standards expected by both you and the petroleum industry.

At AMOSC, we take pride in our role as Australia's leading organization dedicated to every aspect of oil spill operations and management. Our courses are built on the extensive practical experience of our expert staff, ensuring credibility and relevance in every course we deliver.

Specializing in competency-based training and assessment, AMOSC equips participants with the practical skills needed to respond effectively to oil spill incidents. The course you're about to undertake is accredited by The Nautical Institute, meeting the industry's growing demand for globally recognised and consistent training.

Throughout your journey with us, our experienced team will assess your progress, providing ample opportunities for you to showcase your capabilities and learnings. We're here to support you every step of the way, ensuring you have the guidance needed to succeed.

Our courses are designed to be highly interactive, creating a dynamic learning environment that enhances both your skills and knowledge. While the course may challenge you, we encourage collaboration with peers and engagement with our team to maximise your learning experience.

Please keep your joining instructions handy for course details and administrative guidance. Should you have any questions, our team is here to help.

On behalf of AMOSC and our dedicated team, we wish you a fulfilling and enjoyable learning experience with us.

Sincerely,

Jessica Miller
General Manager – Capability Building & Projects

The following information includes details on how to complete Part 1 of your course via our online learning portal and participate in Part 2 face-to-face at our Fremantle training facility.

Introduction

The course in Oil Spill Response Management (IMO 2 Equivalent) has been designed to meet the needs of member companies who have identified staff as functional leads in oil spill response incident management teams.

The course provides a practical and theoretical grounding in key oil spill response management techniques and applies these learnings through intensive functional desktop exercises that simulate an incident management team environment.

| | |
|--------------------------|---|
| <p>Audience</p> | <p>Industry managers, subject matter experts and government personnel who may be required to fulfil functional area leads within an oil spill response incident management team.</p> <p>Emergency managers from other disciplines seeking to broaden their knowledge and expertise; aspiring emergency managers with strong oil industry or oil spill response knowledge. Incident management staff seeking to broaden their knowledge of oil spill response planning, operations and logistics roles.</p> |
| <p>Aim</p> | <p>To provide participants with the knowledge and skills to be appointed as a member of an oil spill Incident Management Team, within an Incident Control Centre.</p> |
| <p>Objectives</p> | <p>At the end of this course, participants should be able to:</p> <ol style="list-style-type: none"> 1. Work within relevant legislation and guiding frameworks including OHS, the intergovernmental agreement and relevant contingency plans. 2. Identify characteristics of and assess oil spills, implement appropriate initial actions and identify and make appropriate notifications. 3. Implement appropriate initial actions and identify and make appropriate notifications in the case of an oil spill. 4. Apply knowledge of a set range of oil spill response strategies to identify appropriate response. 5. Apply knowledge to identify appropriate oil spill response equipment. 6. Record, communicate and distribute oil incident response information within the structured environment of an incident control centre. 7. Work within a multi-agency oil spill management team in an oil spill response control centre. 8. Within a defined structure, contribute to developing and implementing an incident action plan. 9. Using a variety of sources, identify, analyse and evaluate information to select, locate and coordinate oil spill response equipment and other resources. 10. Coordinate the logistics to manage the temporary storage and disposal of oil spill waste. 11. Fulfil IMT roles within an IMS responding to marine spills. |
