AMOSC is a Nautical Institute
accredited training provider

**Competency-based
Training with exposure
to industry technical
specialists**

**Learn the
fundamentals of oil
spill response**

**Hands-on experience
with oil spill response
equipment**

**Balanced approach
between theory and
practical sessions**

This course provides training in the safe and effective operation of offshore, nearshore and shoreline oil spill response equipment for individuals and team leaders.

It is designed for industry personnel involved in the practical aspects of oil spill response, including oil facility/ marine terminal responders, aspiring AMOSC Core Group Members and nominated personnel suitable for site supervisory roles.

The course offers theoretical and practical opportunities to develop skills and knowledge in:

- Oil spill assessment and notification procedures
- Oil spill response techniques and strategies
- Identification, operation, deployment and recovery of oil spill response equipment
- Site assessment, decontamination and waste management, and
- Communications between tactical field operations and an operational Incident Management Team.
