AMOSC is a Nautical Institute  
accredited training provider

Learn the  
fundamentals of  
oil spill response  
leadership

Participate in  
classroom activities  
with experienced  
facilitators

First hand exposure  
to oil spill response  
equipment

Engage in simulated  
oil spill response  
exercises

### Expert Facilitator Led Sessions at AMOSC

This course provides participants with the knowledge and skills needed to be appointed as an Incident Controller and to effectively lead an Incident Management Team.

It is designed for industry personnel appointed by their organisation to act as an Incident Controller in an Incident Management Team (IMT) for a marine oil spill response.

The course offers practical and theoretical opportunities to develop skills and knowledge in the following:

- Fundamentals of an oil spill response
- The leadership of an oil spill management team
- Roles and responsibilities of Incident Management Team functions
- Identification of response objectives, appropriate response strategies and alternative response options
- Decision-making and communication
- Relevant legislation, frameworks, intergovernmental agreements and Oil Pollution Emergency Plans.

### Scenario Simulations (1 day) Face-to-Face at AMOSC

Real-time oil spill response simulations, utilising an Oil Pollution Emergency Plan. Incident controllers will work with an Incident Management Team (IMO 2 Equivalent course participants) to set response objectives, select appropriate response strategies and oversee the implementation of an Incident Action Plan.
