\$3,432.00 incl GST

AMOSC is a Nautical Institute accredited training provider

Self-paced e-Learning

Participate in classroom activities with experienced facilitators

Engage in simulated oil spill response exercises

Virtual Warehouse Tour

This course provides participants with the knowledge and skills needed to be appointed as members of an oil spill Incident Management Team (IMT), within an Incident Control Centre.

The Blended Course is delivered in three parts:

Self-paced eLearning

Undertake self paced eLearning (approx. 8-10hrs) through our Learning Management System – modules cover the fundamentals of oil spill response and a virtual warehouse tour.

AMOSC Classroom (1 day) Face-to-Face at AMOSC

Modules cover IMT response roles and responsibilities, supporting tools and resources and developing an Incident Action Plan.

Scenario Simulations (1 day) Face-to-Face at AMOSC

Real-time oil spill response simulations, utilising an Oil Pollution Emergency Plan. Focuses on initial actions, gaining and maintaining situational awareness, selecting appropriate spill response strategies and supporting equipment, as well as consideration of health and safety, communications and waste management.
